Moderate

Advisory ID: OMSA-2024-0001

CVSSv3 Range: 6.8

Issue Date: 2024-06-27

Updated On: 2024-06-27 (Initial Advisory)

CVE(s): CVE-2024-22260

Synopsis: VMware Workspace One UEM update addresses an information exposure vulnerability (CVE-2024-22260)

1. Impacted Products

VMware Workspace ONE UEM

2. Introduction

A vulnerability affecting Workspace ONE UEM endpoints was responsibly reported to VMware. Updates are available to remediate this vulnerability in affected VMware products.

3. Injection Vulnerability (CVE-2024-22260)

Description

Workspace ONE UEM endpoints contain an information exposure vulnerability. VMware has evaluated the severity of this issue to be in the Moderate severity range with a maximum CVSSv3 base score of **6.8**.

Known Attack Vectors

A malicious actor with network access to the Workspace One UEM may be able to perform an attack resulting in an information exposure.

Resolution

To remediate CVE-2024-22260 apply the updates listed in the 'Fixed Version' column of the 'Response Matrix' below.

Workarounds

None.
